# Subject Index

Aluminium pipelines .....19-27,29-38
ASME Boiler and Pressure Vessel Code Section III 159-170
Automated visual inspection .....45-52
Availability of mechanical systems .....205-216
Axisymmetric models .....217-226
Axisymmetric shell theory, thin .....151-158

Batch manufacturing .....121-124
Batelle model .....19-27
Beams, longitudinal .....109-119
Bending, seismic .....159-170
Birch wood veneer board defects .....45-52
Birch wood veneer board segmentation .....45-52
Burst pressures, pipeline .....19-27
Butt welds .....217-226

CAD - *see* Computer aided design
Centre bodies .....193-203
Chopped-strand mat pipes .....181-192
Clean room flow measurement .....9-18
Clean room thermohydraulics .....9-18
Coating processes .....125-134
Combustors, cyclone .....121-124
Composite pipes .....181-192
Computational fluid dynamics .....9-18,83-91
Computer aided design .....135-138,139-150
Computer software .....125-134
Contractions, turbulent flow in pipe .....171-180
Corrosion, pipe .....217-226
CSM pipes - *see* Chopped-strand mat pipes
Cyclone combustors .....121-124
Cyclone dust separator exhausts .....193-203
Cylindrical shells .....109-119

Damage, impact .....181-192
De-swirl vanes .....193-203
Dents, pipeline .....19-27,29-38
Design, computer aided .....135-138,139-150
Design, warships .....139-150
Design process, triple helix .....135-138
Design stress indices .....159-170
Discharge, steel silos .....101-108
Discretized models .....109-119
Drawing process, Mandrell .....65-74
Dust separator exhausts, cyclone .....193-203

Effluents .....83-91
Engineering, marine .....139-150
Exhausts, cyclone dust separator .....193-203

Failure mode and effect analysis .....205-216
Fault tree analysis .....205-216
Filament wound pipes .....181-192
Flow, turbulent, in pipe contractions .....171-180
Flow measurement, clean room .....9-18
Flow measurement, hoppers .....1-8
Flow measurement, powdered materials .....1-8
Flow resistance, high .....93-100
Flow resistance, low .....93-100
Flowmeters .....93-100
Fluid freezing modelling, pipe .....151-158
Fluidic flowmetering device .....93-100
FMEA - *see* Failure mode and effect analysis
Folders, jaw .....53-63
Folders, printing press .....53-63
Freezing, modelling pipe fluid .....151-158

Gouges, pipeline .....19-27
Granulation, wet .....121-124
GRP pipes - *see* Filament wound pipes

Handling, paper .....53-63
High flow resistance .....93-100
Hopper flow measurement .....1-8
Hydrodynamic modelling .....83-91

Ice plug formation .....151-158
Impact damage .....181-192
Ion-plating machines, magnetron .....125-134

Jaw folders .....53-63
Johanson indiciser system .....1-8

Lamb waves in pipes .....217-226
Limit analysis, plastic .....75-78
Limit pressure analysis .....75-78
Liverpool Experimental Programme .....159-170
Longitudinal beams .....109-119
Low flow resistance .....93-100
Low-level interface .....125-134

Magnetron ion-plating machines .....125-134
Mandrell drawing process .....65-74
Marine engineering .....139-150
Mat pipes, chopped-strand .....181-192
Mechanical systems availability .....205-216
Model, batelle .....19-27
Modelling .....135-138
Modelling, hydrodynamic .....83-91
Modelling pipe fluid freezing .....151-158
Models, axisymmetric .....217-226
Models, discretized .....109-119

Nozzles, radial .....75-78

Offshore installation requalification .....39-43
Offshore installation structural assessment .....39-43

Paper handling .....53-63
Pharmaceutical products .....121-124
Pipe contractions, turbulent flow .....171-180
Pipe corrosion .....217-226
Pipe fluid freezing modelling .....151-158
Pipe stresses .....151-158

© IMechE 1996

Pipeline burst pressures ..... 19-27
Pipeline dents ..... 19-27,29-38
Pipeline gouges ..... 19-27
Pipeline strain, pressurized ..... 29-38
Pipeline strain distribution ..... 29-38
Pipelines, aluminium ..... 19-27,29-38
Pipes, chopped-strand mat ..... 181-192
Pipes, composite ..... 181-192
Pipes, filament wound ..... 181-192
Pipes, Lamb waves in ..... 217-226
Piping elbows ..... 159-170
Planform silos, square ..... 101-108
Plastic limit analysis ..... 75-78
Plating machines, magnetron ion ..... 125-134
Polyvinyl chloride tubes ..... 65-74
Powdered materials flow measurement ..... 1-8
Precessing vortex core ..... 193-203
Pressure analysis, limit ..... 75-78
Pressure measurement ..... 101-108
Pressure vessels, spherical ..... 75-78
Pressurized pipeline strain ..... 29-38
Printing press folders ..... 53-63
Processors, single-vessel ..... 121-124
PVC - *see* Polyvinyl chloride

Radial nozzles ..... 75-78
Reliability assessment ..... 205-216
Requalification, offshore installation ..... 39-43
Reynolds numbers ..... 171-180
Ring analysis ..... 109-119
Royal Navy ..... 139-150
Sedimentation tanks ..... 83-91
Segmentation, birch wood veneer boards ..... 45-52
Seismic bending ..... 159-170
Semiconductors ..... 9-18
Separator exhausts, cyclone dust ..... 193-203
Shells, cylindrical ..... 109-119
Silos, square planform ..... 101-108
Single-vessel processors ..... 121-124
Software - *see* Computer software
Spherical pressure vessels ..... 75-78
Square planform silos ..... 101-108
Steel silo discharge ..... 101-108
Strain, pressurized pipeline ..... 29-38
Strain distribution, pipeline ..... 29-38
Stress indices, design ..... 159-170
Stresses in pipes ..... 151-158
Structural assessment, offshore installation ..... 39-43
Submarines ..... 139-150

Tanks, sedimentation ..... 83-91
Thermohydraulics, clean room ..... 9-18
Thin axisymmetric shell theory ..... 151-158
Triple helix design process ..... 135-138
Tubes, polyvinyl chloride ..... 65-74
Turbulent flow in pipe contractions ..... 171-180

Vanes, de-swirl ..... 193-203
Variable recovery venturi ..... 93-100
Veneer board defects, birch wood ..... 45-52
Veneer board segmentation, birch wood ..... 45-52
Venturi, variable recovery ..... 93-100
Vessels, pressure - *see* Pressure vessels
Visual inspection, automated ..... 45-52
Vortex core, precessing ..... 193-203

Warship design ..... 139-150
Waves in pipes, Lamb ..... 217-226
Welds, butt ..... 217-226
Wet granulation ..... 121-124
